

T BAKE
Bakery Tools.io

The perfect hub and tool pool explorer for Binance Smart Chains & a hotspot for projects

The features !

Analytic Data

Real-time data analysis connected to BSC bakery & pancakeswap. We plan to integrate erc20 DEX in the near future.

Multi-Pairs & Pools

With Bakerytools, you will be able to save you favourite trading pairs at the top, and be notified of any significant changes of your pair or if your transaction was filled. You will be given the correct tools and graphics to analyse any pair on our website

Hotspot

BakeryTools will provide you information on upcoming Private Sales and presales. Projects will be able to apply and only when verified will they be on the Upcoming Hotspot. Projects will also be able to subscribe to our ADS on our website

What is Hotspot

A private/pre-sale gem capturer.

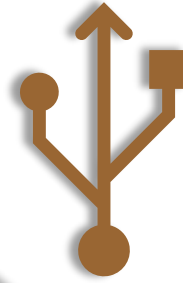

An integral part of the crypto space for projects in raising funds has been through private and presale funds. Many projects find it difficult to broadcast their private sale. Bakerytools's very first and owned Hotspot will provide exposure to verified projects listed on hotspot as well as featuring in our (ADS). Whilst providing hot projects with exposure, it will give you the opportunity to invest in upcoming projects in your interest of upcoming private and pre-sales.

Companies:

- Application Process (mandatory)
- Verification (mandatory)
- Rated by user interest
- Website Featuring ADS(optional)
- ROIx feature
- From the fees, 30% of the fees will be collected in TBAKE and burned and for every ADS feature 60% = TBAKE will be burned every quarter.
